

Easy for you. Fun for baby.

Sensory Corn Flour

Ingredients

You need just 2 ingredients to make this marvellous gloop:

- 2 cups of cornflour
- 1 cup of water

Method

Mix the cornflour and water (and food colouring if used) in a bowl until it forms a gloopy mixture.

It's so quick and simple! Feel free to play with the consistency until it is how you would like it - add more cornflour or water to make it thicker or thinner.

Let baby enjoy how gloopy and gooey it feels as it oozes through their hands and runs through their fingers!

Add bowls and utensils for them to stir and play, or you could even drop in a few washable toys for them to coat with their gooey mixture!
